

# How To Calculate Purchase Price When Using the Planting Rainbows Green Bottle Method

1. Review the guidelines of each of the green bottles.
2. Decide which green bottle best describes your situation.
3. Using the table, determine your pricing.
4. If you qualify for a reduced rate, determine the percentage to subtract from the listed price.
5. Open a new tab and Google "calculator".
6. Type in the listed price, then the minus key, then the percent reduction (18% or 30%) you are eligible for, then the percent key, then the equals key.
7. This is the price you will pay in check out.
8. Please list which Green Bottle you used in the notes section at checkout.
